SUMMARY

Software Engineer with 1+ years of enterprise experience at Accenture as a Web Developer Associate, working on Adobe Experience Manager, website deployments, and production support. Currently building practical strength in Python backend development, machine learning systems, and cloud deployment through focused personal projects. Looking to move into software engineering and AI/ML roles where I can apply both enterprise delivery experience and hands-on technical skills.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Backend & Frameworks: FastAPI, Flask, REST APIs, Pydantic, Streamlit

Databases: PostgreSQL, Redis, SQLAlchemy

AI / ML: Machine Learning, scikit-learn, pandas, PyTorch, Transformers, LLMs, RAG

DevOps & Cloud: Docker, AWS, Git, Linux, CI/CD

Enterprise: Adobe Experience Manager (AEM), Website Management, Agile / Scrum

EXPERIENCE

ACCENTURE

Web Developer Associate | October 2024 - Present | Mumbai, India

- Worked on Adobe Experience Manager (AEM) for enterprise websites - using components, templates, and content workflows so business teams could manage pages and digital assets without needing engineering support
- Worked with HTML, CSS, JavaScript, and AEM to support website development and content changes, adjusting layouts and styling where needed
- Coordinated website updates and deployments across development, staging, and production environments using enterprise CI/CD pipelines
- Investigated website issues, supported production fixes, and worked with QA and business teams through release cycles to get changes live
- Participated in Agile / Scrum delivery, supporting development activities, testing, deployment, and post-release validation

PROJECTS

AQUA-INTEL

Python | scikit-learn | pandas | Data Processing | Machine Learning

- Built an end-to-end machine learning system that predicts irrigation needs in arid climates using climate and soil data
- Processed and cleaned environmental datasets, engineered features, and trained models to optimize water usage for sustainable agriculture
- Focused on real-world applicability: water security, sustainability, and AI-driven solutions for resource-scarce regions

AI Career Coach

Python | Flask | AI APIs | Backend Development

- Developed a backend application that generates structured career plans based on user skills, goals, and experience
- Integrated AI APIs to process natural language input and produce actionable, personalized career roadmaps
- Built with Flask to simplify decision-making for non-technical users entering or transitioning in tech

Personal Expense Analyzer

Python | FastAPI | Data Processing | REST API

- Developed a FastAPI backend that analyzes financial statements, categorizes transactions, and generates spending insights
- Built data processing pipelines to extract, clean, and classify financial data from various sources
- Designed REST endpoints for uploading statements and retrieving categorized expense reports with visual summaries

Heat Wave Prediction System

Python | Streamlit | Plotly | Data Visualization

- Built a Streamlit-based application forecasting temperature trends and visualizing weather conditions across Indian cities
- Processed historical weather data to identify patterns and trends, evolving the system toward heatwave prediction capabilities
- Created interactive visualizations with Plotly to make climate data accessible and actionable for users

EDUCATION

Bachelor of Engineering - Information Technology

A.P. Shah Institute of Technology, Mumbai University | 2024
