SUMMARY

Software Engineer with 1+ years of enterprise experience at Accenture as a Web Developer Associate, working on Adobe Experience Manager, website deployments, and production support. Currently building practical strength in Python backend development, machine learning systems, RAG pipelines, and cloud deployment through focused personal projects. Looking to move into software engineering and AI/ML roles where I can apply both enterprise delivery experience and hands-on technical skills.

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, HTML, CSS
- Software Engineering: FastAPI, REST APIs, PostgreSQL, Redis, Git, Linux, Docker
- AI / ML: Machine Learning, scikit-learn, PyTorch, Transformers, LLMs, RAG, Model Training & Evaluation
- Cloud: AWS, CI/CD, Application Deployment
- Enterprise: Adobe Experience Manager (AEM), Website Management, Agile / Scrum

EXPERIENCE

ACCENTURE

Web Developer Associate | October 2024 - Present | Mumbai, India

- Worked on Adobe Experience Manager (AEM) for enterprise websites - using components, templates, and content workflows so business teams could manage pages and digital assets without needing engineering support
- Worked with HTML, CSS, JavaScript, and AEM to support website development and content changes, adjusting layouts and styling where needed
- Coordinated website updates and deployments across development, staging, and production environments using enterprise CI/CD pipelines
- Investigated website issues, supported production fixes, and worked with QA and business teams through release cycles to get changes live
- Participated in Agile / Scrum delivery, supporting development activities, testing, deployment, and post-release validation

PROJECTS

Production Machine Learning Platform

Python | scikit-learn | FastAPI | SQL | Docker | AWS

- Built an end-to-end machine learning application covering data preparation, feature engineering, model training, evaluation, and inference
- Developed a REST API with FastAPI to serve model predictions and integrated a SQL database for application and prediction data
- Containerized and deployed the application on AWS, with basic monitoring and performance tracking

Enterprise RAG & AI Platform

Python | Transformers | Embeddings | Vector Database | FastAPI | AWS

- Built a RAG-based application covering document ingestion, text chunking, embeddings, retrieval, and LLM-generated responses
- Developed a FastAPI backend for document upload and question answering, with evaluation of retrieval quality and response relevance
- Containerized the application and designed the system for cloud deployment, with attention to response quality, latency, and failure handling

EDUCATION

Bachelor of Engineering - Information Technology

A.P. Shah Institute of Technology, Mumbai University | 2024
